FORMALDEHYDE

Why Should You Be Concerned?*

- Formaldehyde is a colorless, strong-smelling gas.
- It can cause watery eyes, burning sensations in the eyes, nose and throat, nausea, coughing, chest tightness, wheezing, skin rashes, and allergic reactions.
- It also has been observed to cause cancer in scientific studies using laboratory animals and may cause cancer in humans.

* Excerpted from "An Update On Formaldehyde" by the US Consumer Product Safety Commission, Washington, DC, 1997.

Melamine/Veneer Particleboard

Virtually every melamine closet being installed today uses a Urea Formaldehyde based adhesive in it's particle board manufacturing process. For the majority of consumers and individuals who live and work with these products everyday there are no noticeable side affects. However, the EPA and a host of other government, scientific and environmental organizations have warned for years about potentially harmful indoor air pollution (VOC's) produced by the off-gas of many Formaldehyde-based products, such as melamine closets.

The time to go 'Green' has arrived.

Technology, pricing and availability have been slowly but steadily catching up with the 'Green' demand within in the building industry - especially here in Colorado. Rocky Mountain Closets Inc. is proud to be one of the only closet companies in Colorado to offer a strictly Formaldehyde FREE product line.

EvolutionTM
Green Closet Systems

Same great closets, just a little 'greener'.

Formaldehyde-FREE closets are good for business, the environment and your customers' health. Have Rocky Mountain Closets design and install your next project and together we can help organize a cleaner and healthier Colorado,
